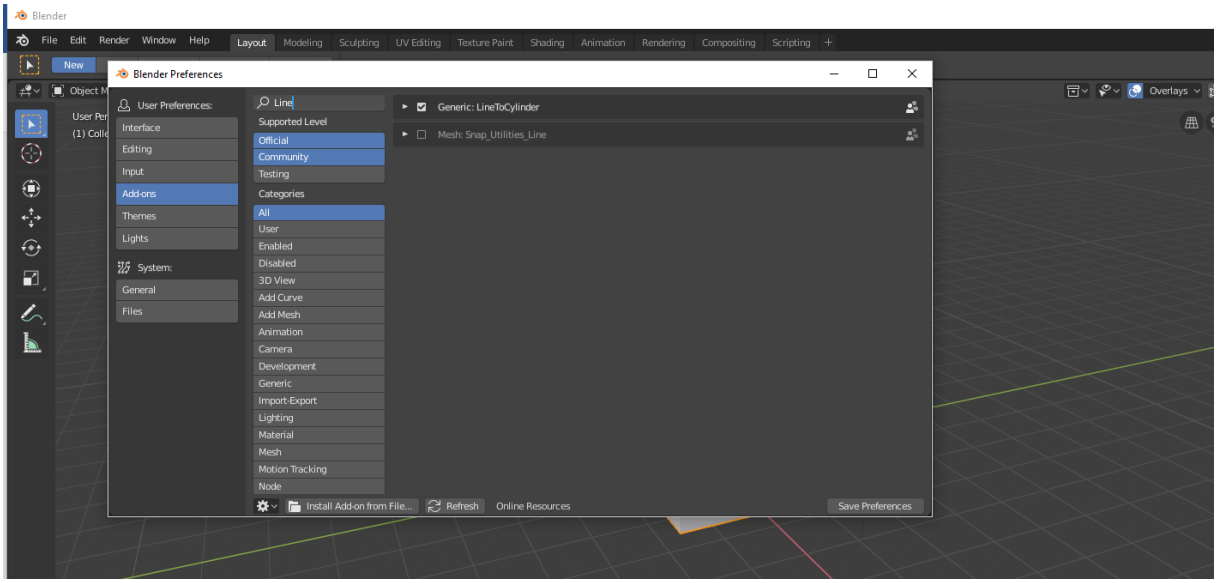
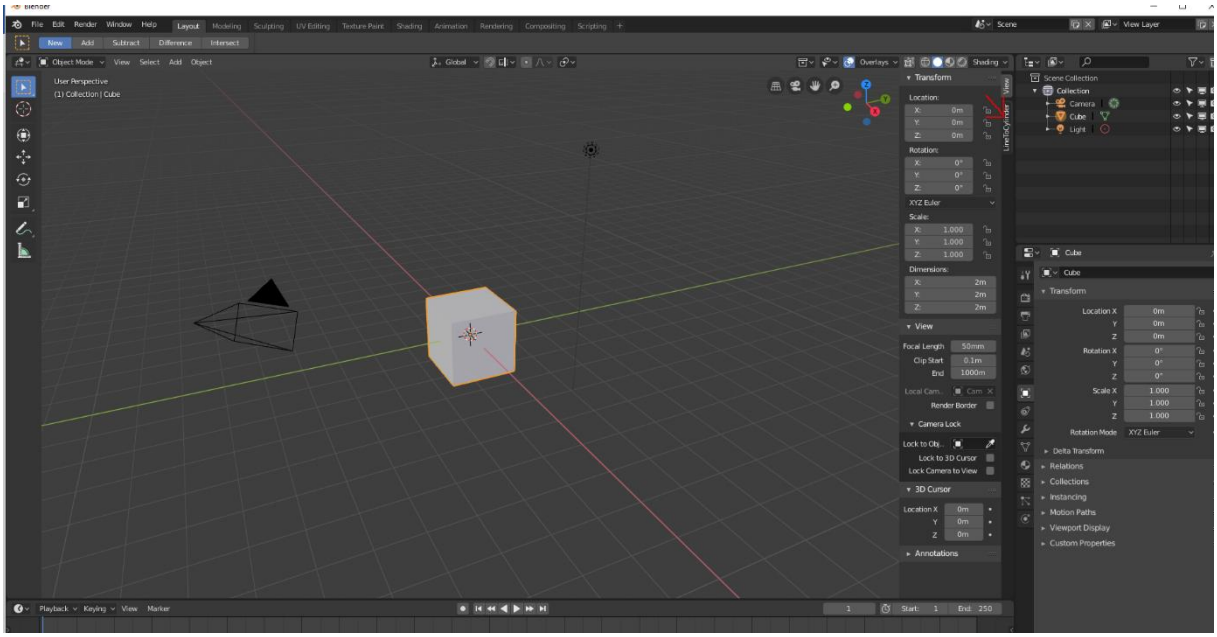
How to Install and use Blender addon

1. Copy paste the directory ('LineToCylinder') in the addon directory : "Program Files\Blender Foundation\Blender-2.8\2.80\scripts\addons"
2. Import sceneCone.obj and SceneLine.obj in blender*
3. Install the addon in blender* :
    a. Edit->Preferences->Addon
    b. Seach and active : "LineToCylinder"





4. Enable the LineToCylinderPanel -> Press "N" key and Click on LineToCylinder Panel
5. Select the Lines :
    a. Press twice "A" to deselect all objects
    b. Click on one Line => all Lines will be selected
6. Click on "Generate Cylinder from Line" -> the Line will be seperated
7. Click again on "Generate Cylinder from Line"
